

SENTRY (Version 2.0) Dual Mode Call Blocker

Setting Up

Option 1 - In Line

Option 2 - Parallel

White List is key

To get the best result, you need to have a White List that includes most of your 'good' callers' phone numbers. White list callers will bypass SENTRY's Stop and Check procedure.

Please watch video instructions for details (www.plugnblock.com)

Operations Manual (Advanced Mode)

1. Create White List.

- Press and hold ACCEPT button to start.
- Use UP/DOWN button to choose number, press REJECT button to move to next digit. Use DELETE button to make corrections.
- When all done, press ACCEPT button to save the number to White List.
- Repeat above steps to add more numbers.
- Press HOME to exit when finished.
- Video instruction available on website (www.plugnblock.com)

2. Set VOICE to A

- Toggle VOICE button to set to A (English)
- This is the Advanced Blocking mode with SENTRY's Stop and Check.

3. Checking Call Log

- When NEW flashes, it indicates unchecked incoming calls.
- Use UP/DOWN button to check call log.

4. Checking White/Black List

To check if a number is on White List, press ACCEPT/WHITELIST button then use UP/DOWN button to go through the White List. (Same for Black List)

5. Adding a number to White/Black List

- From Home screen, press UP/DOWN to find the number.
- Press and hold ACCEPT/REJECT button until DONE flashes. Now the number is on White/Black List.

6. Removing a number from White/Black List

- Press WHITE LIST button to show list, press UP/DOWN to find the number.
- Press DELETE twice quickly to erase that number.
- Same for Black List.

7. Block all No Caller ID call

- On Home screen, press and hold REJECT button until you see BLOCK NO CID.
- All calls not showing caller id will be blocked.
- To turn off, press and hold REJECT button until BLOCK NO CID disappears.

8. Screen Brightness

- On Home screen, press and hold UP button until you see LCD on screen.
- Press UP button to adjust brightness levels, then press HOME to set.

9. Setting time on Home Screen

- Press and hold VOICE button until date/time line blinks
- Use UP/DOWN button to choose number, press ACCEPT to move to next.
- Press Home to save when done.
- Screen time may not be accurate due to power fluctuations in the phone line.

10. Turn off SENTRY's ringer

- On Home screen, press and hold DOWN button until you see DONE.
- To turn on the ringer, press and hold DOWN button until you see DONE.

11. Using Basic Mode

- Toggle VOICE button to OFF.
- SENTRY now blocks callers on Black List only.
- You can still block all No CID calls. Please refer to 7.

Common Problems

Getting Jammed and Reset

If you get no response from pressing buttons, the system is jammed. Please reset SENTRY. Just unplug from and plug back to the TO LINE jack. Resetting will not affect the saved data except for the screen time.

Caller ID not showing on my phone

While connecting in series, some phones (Panasonic and Uniden) can not display caller id. Using Parallel connection will solve the problem.

Blank Screen

You may have inadvertently dimmed the screen.

Press and hold UP button for 3 seconds, release and quickly press the same UP button a few times to see the change of screen, choose LCD 5 and press HOME to save.
